Upper Atmosphere Physics

No. 9

Papers presented at the "18th Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions" held at the National Institute of Polar Research, Tokyo, November 1-2, 1994

CONTENTS

MHD vortices in the magnetospheric low latitude boundary layer <i>Huigen YANG, Zhengyu ZHAO and Shen WANG</i> ...	1
A convection enhancement event observed with the Polar Patrol Balloon #4 <i>Yusuke EBIHARA, Akira KADOKURA, Yutaka TONEGAWA, Fumio TOHYAMA, Natsuo SATO, Yo HIRASIMA, Michiyoshi NAMIKI, E.A. BERING III, J.R. BENBROOK and Masaki EJIRI</i> ...	12
Polar cusp, plasma mantle particles and their relationships to polar rain <i>Kazuo MAKITA and Masaru AYUKAWA</i> ...	25
Particle precipitation associated with transverse Pc5 pulsations <i>Masahito NOSÉ, Toshihiko IYEMORI, Masahisa SUGIURA and James A. SLAVIN</i> ...	34
Influences of solar-terrestrial events on atmospheric environment over Syowa Station, Antarctica: A preliminary analysis of radiosonde observa- tions <i>Takashi WATANABE</i> ...	42
Investigation of plasma density disturbances caused by spacecraft-plasma interactions at $4 R_S$ <i>Masaki OKADA, B.T. TSURUTANI, B.E. GOLDSTEIN, Hiroshi MATSUMOTO, A.L. BRINCA and P.J. KELLOGG</i> ...	56
Systematic analysis of auroral conjugacy: An application to periodic pulsating aurora (extended abstract) .. <i>Hirokazu MINATOYA, Natsuo SATO, Thorsteinn SAEMUNDSSON and Takeo YOSHINO</i> ...	63
Relativistic electron precipitation near the outer boundary of the radiation belt (extended abstract) <i>Rumi NAKAMURA, Daniel N. BAKER, J. Bernard BLAKE and Shri KANEKAL</i> ...	67

Time lag of auroral breakup in conjugate hemispheres (extended abstract) .. <i>Natsuo SATO, Takayuki NAGAOKA and Thorsteinn SAEMUNDSSON</i> ...	72
Computer experiments for interactions of inhomogeneous plasma and HF electromagnetic waves on ionospheric heating experiments (extended abstract) <i>Hiroko UEDA, Yoshiharu OMURA and Hiroshi MATSUMOTO</i> ...	75
A comparative study of auroral modulation and ground Pi2 oscillations (extended abstract) <i>Osamu WATANABE, Osuke SAKA, and Daniel N. BAKER</i> ...	79
