

**Papers presented to the INTERNATIONAL SYMPOSIUM  
Evolution of Solar System Materials: A New Perspective from Antarctic Meteorites  
held at the National Institute of Polar Research, Tokyo  
September 3 - 5, 2003**

1. Akaki T. and Nakamura T.  
Oxygen isotopic compositions of compound chondrules in CV3 chondrite Allende and Axtell
2. Amari S.  
The origin of Ne-E(L)
3. Aoki T., Akai J. and Makino K.  
HRTEM study of characteristic carbon minerals and globules in carbonaceous chondrites
4. Arai T.  
Yamato 983885: Lunar highland breccia with alkali anorthosite
5. Buchanan P.C. and Ebihara M.  
An unequilibrated, Nuevo Laredo trend eucrite clast from Yamato-86762
6. Burbine T.H., Folco L., Capitani G., Bland P.A., Menzies O.N., McCoy T.J., Dyar M.D., Bus S.J. and Binzel R.P.  
Evidence for submicroscopic iron in an ordinary chondrite impact melt
7. Clayton R.N. and Mayeda T.K.  
Oxygen isotopes in carbonaceous chondrites
8. Cloutis E.A. and Hudon P.  
Reflectance spectra of ureilites
9. Davis A.M., Mendybaev R.A. and Richter F.M.  
Evaporation of CMAS-liquids under reducing conditions: Constraints on the formation of Type B1 CAIs
10. Dreibus G., Haubold R., Huisl W. and Spettel B.  
Comparison of the chemistry of Yamato 980459 with DaG 476 and SaU 005
11. El Goresy A., Dubrovinsky L., Sharp T.G., Gillet Ph., Beck P. and Chen M.  
A menagerie of shock-induced very dense minerals in SNC meteorites: Constraints to the pressure and temperature histories of shergottites
12. Fagan T.J., Krot A.N., Keil K. and Yurimoto H.  
Detection of OH-rich domains by SIMS analyses of Efremovka AOAs: Was an aqueous fluid present during alteration?
13. Fedkin A.V. and Grossman L.  
Effect of fractional crystallization on  $\delta^{25}\text{Mg}$  of evaporation residues of CMAS liquids
14. Funaki M. and Syono Y.  
Magnetic properties of shock remanent magnetization acquired to 5, 10 and 20GPa: Demagnetized Cu98%Cu2% Alloys
15. Greshake A., Fritz J. and Stöffler D.  
Petrography and shock metamorphism of the unique shergottite Yamato 980459
16. Grossman L. and Fedkin A.V.  
Elemental abundance constraints on condensation of Allende matrix olivine

17. Guan Y., Huss G.R. and Leshin L.A.  
<sup>60</sup>Fe, <sup>53</sup>Mn, and nickel isotope anomalies in sulfides from enstatite chondrites
18. Gucsik A., Ninagawa K., Nishido H., Toyoda S. and Tsuchiyama A.  
Planar microdeformations of the experimentally shocked plagioclase
19. Hashizume K., Chaussidon M. and Marty B.  
On the formation processes of meteoritic organics - A clue from the solar C and N isotopic compositions
20. Hiroi T.  
Searching for the parent bodies of meteorites through reflectance spectroscopy: Current state
21. Huss G.R.  
Implications of presolar grains and isotopic anomalies for solar system formation
22. Ikeda Y.  
Petrology of the Yamato 980459 shergottite
23. Imae N. and Zolensky M.E.  
Mineralogy and petrology of a Rumuruti chondrite, including a large unequilibrated clast: PRE95404
24. Itoh D. and Tomeoka K.  
Nepheline formation in chondrules in CO3 chondrites: Relationship to parent-body thermal metamorphism
25. Jagoutz E., Dreibus G. and Jotter R.  
On the search for a neodymium-142 anomaly in terrestrial and martian rocks
26. Jones J.H. and McKay G.A.  
Origin of olivine xenocrysts in angrites: A ureilite connection?
27. Kim K.J. and Reedy R.C.  
Terrestrial ages using ratios of cosmogenic radionuclides: Numerical simulations
28. Kimura M., Hashimoto A., Hiyagon H. and Ushikubo T.  
Mineralogical study of ultrarefractory-element-rich nodules in Allende, Efremovka and Murchison
29. Kitazato K. and Kurosawa M.  
Highly-silicic glass inclusions in eucrites and diogenites
30. Koizumi E., Mikouchi T., Monkawa A. and Miyamoto M.  
The origin of olivine megacryst in the Dar al Gani 476 basaltic shergottite and its paired meteorites: Verification of three models
31. Komatsu M., Miyamoto M., Mikouchi T., Krot A.N. and Keil K.  
Thermal history of amoeboid olivine aggregates: An experimental study
32. Komiya M., Naraoka H., Mita H. and Shimoyama A.  
Amino acids and hydrocarbons in the Sayama and Antarctic Asuka carbonaceous chondrites
33. Krot A.N., Petaev M.I. and Bland P.A.  
Multiple formation mechanisms of ferrous olivine in CV carbonaceous chondrites during fluid-assisted metamorphism
34. Kurahashi E., Kita N.T. and Nagahara H.  
Bulk chemical compositions of individual chondrules in least equilibrated carbonaceous chondrites

35. Kurat G.  
Why iron meteorites cannot be samples of planetesimal smelting
36. Leya I., Wiechert U.H. and Wieler R.  
Production rates of cosmogenic Kr isotopes in H-chondrites with known chlorine-36/argon-36 ages
37. Ma P., Herzog G.F., Faestermann T., Knie K., Korschinek G., Rugel G. and Caffee M.  
Cosmogenic radionuclide records in brachinites
38. Marty B., Mathew K.J. and Marti K.  
Noble gases in newly discovered SNC: Insights into the evolution of Mars and comparison with Earth
39. Matsui T. and Senshu H.  
Early thermal history of asteroid 4 Vesta
40. McKay D.S., Rao M.N., Thomas-Keptra K.L., Wentworth S.J., Clemett S. and Gibson E.K.  
Complex chemical weathering revealed in martian meteorite EET79001, and implications for life
41. McKay G. and Mikouchi T.  
Crystallization of Antarctic shergottite Yamato 980459
42. Messenger S. and Keller L.P.  
Silicate stardust from comets
43. Mieda Y., Ueda H., Ninagawa K., Imae N., Kojima H. and Yanai K.  
Thermoluminescence study of Japanese Antarctic meteorites VII
44. Mikouchi T., Koizumi E., McKay G., Monkawa A., Ueda Y. and Miyamoto M.  
Mineralogy and petrology of the Yamato 980459 martian meteorite: A new shergottite-related rock
45. Misawa K.  
The Yamato 980459 shergottite consortium
46. Miura Y., Koga N. and Nakamura A.  
Impact structures in Japan: Case of Takamatsu-Kagawa district
47. Monkawa A., Mikouchi T., Koizumi E. and Miyamoto M.  
Magmatic inclusion in olivine of the Chassigny martian meteorite: Comparison with other martian meteorites inclusions
48. Murty S.V.S., Mahajan R.R., Das J.P., Sinha N. and Goswami J.N.  
Trapped and cosmogenic gas components and nuclear tracks in the nakhlite Y000593
49. Murty S.V.S., Das J.P., Mahajan R.R., Sinha N. and Goswami J.N.  
Cosmic ray exposure history and trapped nitrogen and noble gases in the lunar meteorite Y983885
50. Nagao K. and Okazaki R.  
Noble gases of Y980459 shergottite
51. Nakamura Keiko, Nakashima S., Shiota D., Zolensky M.E. and Keller L.P.  
In situ step heating experiments of organic components in Tagish Lake meteorite
52. Nakamura Kentaro, Tsuchiyama A., Nakano T. and Uesugi K.  
Quantitative evaluation of the relation between X-ray linear attenuation coefficient and CT value, and its application to 3-D element distribution of micrometeorites

53. Nakamura N., Kobayashi T. and Yamashita K.  
REE abundances and Rb-Sr systematics of the Yamato 980459 shergottite: A progress report
54. Nakamura T.  
Dehydrated regolith material of hydrous asteroids
55. Nakashima D. and Nakamura T.  
Primordial and solar noble gases in enstatite chondrites
56. Nishiizumi K.  
Exposure histories of lunar meteorites
57. Noguchi T., Imae N., Misawa K. and Nakamura T.  
Mineralogy of “iddingsite” and symplectite in Y000593 and 000749: Implication for their post-crystallization and aqueous alteration
58. Nyquist L.E. and Bogard D.D.  
Isotopic studies of basaltic meteorites: Constraints on the size and thermal history of differentiated asteroids
59. Ohnishi I. and Tomeoka K.  
Hydrothermal alteration experiments of enstatite: Implications for aqueous alteration in CM and CV chondrites
60. Okazaki R. and Huss G.R.  
A huge chondrule in an enstatite chondrite St. Marks
61. Okazawa T., Tsuchiyama A., Yano H., Noguchi T., Osawa T., Nakano T. and Uesugi K.  
Densities of Antarctic micrometeorites and chondrites using X-ray microtomography
62. Osawa T., Kagi H. and Nagao K.  
Infrared spectroscopic classification of carbonaceous chondrite clans based on water-induced absorption bands
63. Oura Y., Takahashi C. and Ebihara M.  
Boron abundances for Antarctic chondritic meteorites
64. Ozono Y., Nakamura T., Osawa T., Noguchi T. and Nagao K.  
The relationship between mineralogical signatures and noble-gas compositions in micrometeorites
65. Pizzarello S.  
The effect of meteorite powders in model amino acid syntheses and reactions
66. Righter K.  
Core formation and mantle differentiation in terrestrial planets: Constraints from Hf, W and the highly siderophile elements (HSE)
67. Sakamoto M., Gucsik A., Ninagawa K., Toyoda S. and Nishido H.  
Planar microdeformations from Oikeyama crater, Nagano Prefecture, central Japan
68. Shih C.-Y., Nyquist L.E. and Wiesmann H.  
Isotopic studies of Antarctic olivine-phyric shergottite Y980459
69. Shirai N. and Ebihara M.  
Chemical composition of Yamato 980459
70. Simon S.B., Grossman L., Campbell A.J. and Humayun M.  
Sector-zoning in fassaite in Type B2 refractory inclusions

71. Sugiura N., Hashizume K., Miyazaki A. and Yanai K.  
Mn-Cr ages of two angrites
72. Szymanski A., El Goresy A., Brenker F.E. and Palme H.  
Application of the Fe-,Ti-thermometer/oxybarometer to Nakhla and Y000593
73. Takeda H., Bogard D.D., Otsuki M. and Ishii T.  
Mineralogy and Ar-Ar age of the Tarahumara IIE iron, with reference to the origin of alkali-rich materials
74. Tatsumi K., Ozawa K., Nagahara H. and Tachibana S.  
Experimental condensation of iron on silicate and metal
75. Tazawa Y., Fukuoka T., Saito Y, Sakurai H., Suzuki Y. and Noguchi T.  
Unmelted chondritic micrometeorites from Antarctic ice revealed by INAA
76. Tomiyama T. and Misawa K.  
 $^{53}\text{Mn}$ - $^{53}\text{Cr}$  chronology of olivines in L chondrites
77. Tsuchiyama A., Yada T., Noguchi T., Nakano T. and Uesugi K.  
Three-dimensional structures of cosmic spherules: Comparison with chondrule shapes
78. Wadhwa M. and Crozaz G.  
Trace element distributions in minerals of the paired Yamato 000593/749 nakhlites
79. Yada T., Nakamura T., Noguchi T., Ushikubo T., Matsumoto N., Kojima H. and Takaoka N.  
Estimation for precursors of silicate spherules based on their oxygen isotopic compositions
80. Yamada K., Nakamura N., Misawa K., Premo W.R., Yamashita K. and Tatsumoto M.  
Sm-Nd isotopic systematics of the lherzolithic shergottite Yamato-793605
81. Yamada M., Tachibana S., Nagahara H. and Ozawa K.  
Isotopic fractionation of Mg during evaporation from different crystallographic surfaces of forsterite
82. Yamashita K., Nakamura N. and Heaman L.M.  
Pb isotopic systematics of Yamato 000593
83. Yin Q.  
Moderately volatile element depletion (MOVED) reveals the chemical links between interstellar dust and primitive chondrites
