

CONTENTS

Foreword	Kou KUSUNOKI...	i
Derivation of atmospheric turbidity at Mizuho Station, Antarctica from the broadband solar radiation measurements	Takashi YAMANOUCHI...	1
Properties of the surface radiation budget at Mizuho Station, Antarctica in 1979 (extended abstract)	Takashi YAMANOUCHI and Sadao KAWAGUCHI...	13
Some radiation properties at Mizuho Station, East Antarctica in 1980.	Nobuyoshi ISHIKAWA, Shun'ichi KOBAYASHI, Tetsuo OHATA and Sadao KAWAGUCHI...	19
Comparison of the air layer near the surface at Mizuho Station with that at other sites in Antarctica	Tetsuo OHATA, Makoto WADA and Sadao KAWAGUCHI...	32
The stability of the air layer near the snow surface at Mizuho Station, Antarctica (extended abstract)	Tetsuo OHATA Makoto WADA and Sadao KAWAGUCHI...	43
Observations of an atmospheric gravity wave by shear instability in katabatic wind at Mizuho Station, East Antarctica.	Shun'ichi KOBAYASHI, Nobuyoshi ISHIKAWA, Tetsuo OHATA and Sadao KAWAGUCHI...	46
Measurements of sensible heat flux in katabatic wind at Mizuho Station, East Antarctica	Shun'ichi KOBAYASHI, Nobuyoshi ISHIKAWA, Tetsuo OHATA and Sadao KAWAGUCHI...	57
Billow clouds observed at the Mizuho Plateau, East Antarctica.	Susumu KANETO...	65
Areal distribution of the height and direction of sastrugi at Mizuho Plateau (extended abstract)	Tetsuo OHATA...	70
Local subsidence flow in a surface boundary layer on the sloped ice sheet at Mizuho Station, East Antarctica (extended abstract).	Shun'ichi KOBAYASHI, Nobuyoshi ISHIKAWA, Tetsuo OHATA and Sadao KAWAGUCHI...	73
Aerological soundings of the surface boundary layer at Mizuho Station, East Antarctica	Sadao KAWAGUCHI, Shun'ichi KOBAYASHI, Nobuyoshi ISHIKAWA and Tetsuo OHATA...	77
Some characteristics of wind and temperature changes in the Syowa Area, Antarctica, in terms of katabatic wind	Kouji MATSUBARA, Takeo UENO, Takahiro SAKAMOTO, Kazumasa MATSUHARA and Sadao KAWAGUCHI...	87
On the satellite remote measurements of vertical temperature profile of the Antarctic atmosphere	Shinya TANAKA, Takeo YOSHINO, Takashi YAMANOUCHI and Sadao KAWAGUCHI...	94

Calculation of the transmission function for remote sensing by meteorological satellite (extended abstract)	Seigo ITO, Shinya TANAKA, Takeo YOSHINO, Takashi YAMANOUCHI and Sadao KAWAGUCHI. . .	101
Remote sensing of atmospheric temperature profile using three cosmic-ray muon components (extended abstract).	Masahiro KODAMA, Michiko MITSUMORI, Kayo IMAI, Aoi INOUE and Masami WADA. . .	105
Oxygen isotopic composition and formation process of snow under anticyclone at Syowa Station, East Antarctica (extended abstract)	Kikuo KATO. . .	108
Correlation between the monthly means of surface air temperature and oxygen isotopic composition of fallen snow at Syowa Station (extended abstract)	Kikuo KATO	113
Oxygen isotopic composition of fallen snow in 1977 at Syowa Station, East Antarctica (extended abstract)	Kikuo KATO and Kunimoto IWAI. . .	117
Dependence of oxygen isotopic composition of surface snow on distance from coast in Mizuho Plateau	Keiji HIGUCHI. . .	122
Analysis of aerological data and cloud observations at Syowa Station, East Antarctica in 1979	Makoto WADA. . .	127
A numerical case study of Arctic stratus in July 1975	Sachio OHTA. . .	133
Fraunhofer diffraction by atmospheric ice crystals (extended abstract)	Yoshihide TAKANO. . .	144
Morphology of single snow crystals growing in air at low temperatures.	Takehiko GONDA and Tetsuya KOIKE. . .	148
Preliminary measurements of the center nucleus of snow crystals using an energy dispersive X-ray microanalyzer	Katsuhiko KIKUCHI, Masataka MURAKAMI and Yoko SANUKI. . .	157
Some considerations on the center nuclei of snow crystals.	Masataka MURAKAMI and Katsuhiko KIKUCHI. . .	175
Behaviour of environment background neutrons of the Antarctic ice field (extended abstract)	Masahiro KODAMA. . .	184
Cosmic spherules in bare ice near the Allan Hills, Victoria Land, Antarctica (extended abstract)	Yuji TAZAWA, Yoshiyuki FUJII and Fumihiko NISHIO. . .	187
A simple method for calculating mass flux in an ice sheet, with a consideration of its temperature profile	Masatoshi NAGAO, Masayoshi NAKAWO and Akira HIGASHI. . .	192
Internal flow lines in the ice sheet upstream of the Yamato Mountains, East Antarctica (extended abstract)	Renji NARUSE and Masayuki HASHIMOTO. . .	201
Densification rates of snow at polar glaciers	Norikazu MAENO. . .	204

An example of analyses of the echo obtained by a radio echo sounder near the Shirase Glacier, East Antarctica, using an original radar equation (extended abstract)	Tatsuji IZUMI, Akira NISHITSUJI, Makoto WADA and Shinji MAE . . .	212
Glacial stratigraphy of Antarctica and of the Northern Japanese Alps: A theoretical climatestratigraphic comparison for the period 4000–2000 y B.P. based on radiocarbon dating (extended abstract)	Christian SCHLÜCHTER and Shoji HORIE . . .	216
The cause of the breakup of fast ice on March 18, 1980 near Syowa Station, East Antarctica	Akira HIGASHI Dougal J. GOODMAN, Sadao KAWAGUCHI and Shinji MAE . . .	222
The freezing process in sea water around East Ongul Island, Antarctica in 1980 (extended abstract)	Shun'ichi KOBAYASHI, Nobuyoshi ISHIKAWA, Yasuhiko NAITO and Sadao KAWAGUCHI . . .	232
Heat balance studies on sea ice near Syowa Station, East Antarctica.	Nobuyoshi ISHIKAWA, Shun'ichi KOBAYASHI, Tetsuo OHATA and Sadao KAWAGUCHI . . .	234
Interpretation of sea ice in satellite imagery (extended abstract).	Nobuo ONO . . .	243
Thermal oscillation induced by an interaction between sea ice and ocean in a numerical polar ice-ocean model.	Satoshi SAKAI and Shiro IMAWAKI . . .	246
Oceanic eddy formation in the Southern Ocean: Compared with other oceans (extended abstract)	Jiro FUKUOKA, Kou KUSUNOKI and Hideo MIYAKE . . .	255
The drill system used by the 21st Japanese Antarctic Research Expedition and its later improvement	Yosio SUZUKI and Kazuyuki SHIRAISHI . . .	259
On the possible thickness of artificial ice built up for airstrip at Syowa Station, Antarctica	Masayoshi NAKAWO . . .	274
Experimental studies on snow control around floor-elevated buildings in the Antarctic (extended abstract)	Toshio SATO, Toshio HANNUKI and Hiromi MITSUHASHI . . .	283
On the origin and nature of Antarctic aerosols	Tomoyuki ITO, Akira ONO and Kunimoto IWAI . . .	289
Measurement of NO ₂ density in the polar stratosphere: Balloon experiment by the 23rd Japanese Antarctic Research Expedition (extended abstract)	Naomoto IWAGAMI, Toshihiro OGAWA and Kazuo SHIBASAKI . . .	297
Observation of atmospheric minor constituents in the Antarctic region by ground-based absorption spectroscopy (extended abstract).	Kazuo SHIBASAKI and Toshihiro OGAWA . . .	299
Observation of atmospheric trace constituents by FTIR (extended		

abstract)	Yukio MAKINO, Hisafumi MURAMATSU, Michio HIROTA and Tohru SASAKI . . .	303
N ₂ O measurement in the polar atmosphere: Preliminary results and plans	Yasunobu IWASAKA, Hisayoshi TERAJ, Aikichi KOBAYASHI and Shigeru MURABAYASHI . . .	307
A promising technique to measure water vapor content in the polar atmosphere: Lyman- α /OH fluorescence hygrometer.	Shigeru MURABAYASHI, Yasunobu IWASAKA, Yoshihiro YAMASHITA, Makoto WADA, Takashi YAMANOUCI, Sadao KAWAGUCHI, Takao KOBAYASHI and Takeo HIRASAWA . . .	318
