

CONTENTS

Foreword	Paul Arthur BERKMAN and Yoshio YOSHIDA	iii
Ecology of the Antarctic bivalve <i>Laternula elliptica</i> (King and Broderip) in Collins Harbor, King George Island: Benthic environment and an adaptive strategy	In-Young AHN	1
Geochemical signatures of meltwater in mollusc shells from Antarctic coastal areas during the Holocene	Paul Arthur BERKMAN	11
Inventory of Holocene marine fossils in Antarctic beaches:	Appendix 1	28
Inventory of <i>in situ</i> molluscan fossil radiocarbon ages and elevations in Holocene beaches around Antarctica:	Appendix 2	32
Preliminary investigation of a method for determining past winter temperatures at Ellis Fjord, eastern Antarctica, from fast-ice diatom assemblages	Andrew McMINN	34
Glaciomarine sedimentation and paleoglacial setting of Marian Cove, King George Island, Antarctica	H. I. YOON, Y. KIM, M. Y. CHOE and S. H. NAM	41
Holocene raised beaches in the Lützow-Holm Bay region, East Antarctica	Masahisa HAYASHI and Yoshio YOSHIDA	49
Inventory of radiocarbon dates from the Lützow-Holm Bay region:	Appendix 3	72
Inventory of radiocarbon dates from raised beaches in Antarc- tica other than in the Lützow-Holm Bay region:	Appendix 5	76
Inventory of elevations and features of raised beaches:	Appendix 6	81
Notes on Late-Glacial retreat of the Antarctic Ice Sheet and Holocene environmental changes along the Victoria Land coast	Carlo BARONI	85
Inventory of ornithogenic soils:	Appendix 7	100
Inventory of radiocarbon dates from Antarctic penguin remains:	Appendix 8	101
