

CONTENTS

Foreword	Yoichi MOTOYSHI and Kazuyuki SHIRAISHI ...	i
Episodic growth of juvenile crust and catastrophic events in the mantle		
Kent C. CONDIE		1
Tectonic development of Early Precambrian orogens		
Brian F. WINDLEY		8
Preservation and retrogression of ultra high pressure (UHP) rocks: Case studies of UHP metagranitoids in Western Alps and Su-Lu region		
Takao HIRAJIMA		29
An appraisal of peak temperatures and thermal histories in ultrahigh-temperature (UHT) crustal metamorphism: The significance of aluminous orthopyroxene		
Simon L. HARLEY		49
Boron and beryllium minerals in granulite-facies pegmatites and implications of beryllium pegmatites for the origin and evolution of the Archean Napier Complex of East Antarctica		
Edward S. GREW		74
Ultra-high temperature metamorphism in the Lewisian Complex, South Harris, NW Scotland		
Sotaro BABA		93
Genesis of the migmatites of Breidvågnaipa, East Antarctica		
Toshiaki SHIMURA, Geoffrey L. FRASER, Noriyoshi TSUCHIYA and Hiroo KAGAMI		109
Thermal structure of the crust during granulite metamorphism: Petrological speculations and geodynamic implications		
Michael V. MINTS and Alexander N. KONILOV		137
Compositional zoning and its implication in a toroidal circulation inside the Yakushima Pluton, SW Japan		
Ryo ANMA, Yoshinobu KAWANO and Masaki YUHARA		157
Metamorphic zonation and formation of granulite in the Shizunai area, the Hidaka Metamorphic Belt, Hokkaido, Japan		
Tadashi USUKI and Teruo WATANABE		177
Rock velocities at atmospheric pressure and room temperature in Tanzawa plutonic rocks from central Japan		
Keigo KITAMURA and Masahiro ISHIKAWA		192
A crustal model and its tectonic implication on the evolution of the Pacific margin of the northern Antarctic Peninsula		
Young Keun JIN and Yeadong KIM		203
A tight fit-Early Mesozoic Gondwana, a plate reconstruction perspective		
Lawrence A. LAWVER, Lisa M. GAHAGAN and Ian W.D. DALZIEL		214
Author index		230
