

Polar Geoscience

No. 19

CONTENTS

Geology of Byôbu Rock and Gobanme Rock, Prince Olav Coast, East Antarctica <i>M. Satish-Kumar, Shin-ichi Kagashima, Yoshimitsu Suda and Yoichi Motoyoshi</i> ...	1
Calc-silicate rocks and marbles from Lützow-Holm Complex, East Antarctica, with special reference to the mineralogy and geochemical characteristics of calc-silicate mega-boudins from Rundvågshetta <i>M. Satish-Kumar, Yoichi Motoyoshi, Yoshimitsu Suda, Yoshikuni Hiroi and Shin-ichi Kagashima</i> ...	37
Geochemistry of mafic metamorphic rocks in the Lützow-Holm Complex, East Antarctica: Implications for tectonic evolution <i>Yoshimitsu Suda, Shin-ichi Kagashima, M. Satish-Kumar, Yoichi Motoyoshi and Yoshikuni Hiroi</i> ...	62
Granulites from Cape Hinode in the amphibolite-facies eastern part of Prince Olav Coast, East Antarctica: New evidence for allochthonous block in the Lützow-Holm Complex <i>Yoshikuni Hiroi, Yoichi Motoyoshi, M. Satish-Kumar, Shin-ichi Kagashima, Yoshimitsu Suda and Naoto Ishikawa</i> ...	89
Rb-Sr and Sm-Nd mineral isochron ages of a pegmatitic gneiss from Oku-iwa Rock, Lützow-Holm Complex, East Antarctica <i>Yoshinobu Kawano, Naoko Nishi and Hiroo Kagami</i> ...	109
Electron microprobe technique for U-Th-Pb and REE chemistry of monazite, and its implications for pre-, peak- and post-metamorphic events of the Lützow-Holm Complex and the Napier Complex, East Antarctica <i>Tomokazu Hokada and Yoichi Motoyoshi</i> ...	118
Mineral ages for multi isotope system in phlogopite-bearing pyroxene granulite and felsic gneiss, the Howard Hills, Enderby Land, East Antarctica: Possible Proterozoic tectonothermal events in the Napier Complex <i>Tomoharu Miyamoto, Yasutaka Yoshimura, Daniel J. Dunkley, Yoichi Motoyoshi and Christopher J. Carson</i> ...	152
