

CONTENTS

Abstract	1
1. Introduction	2
2. Instrumentation	5
3. Rocket Flight and Associated Auroral Activity	9
4. Atmospheric Attenuation of Auroral X-Rays	13
5. Spinning and Precession Modulations of Auroral X-Rays	17
6. Spatital Distributions of Auroral X-Rays and Their Temporal Variations	21
7. Similarities and Dissimilarities between Auroral X-Ray and Ultraviolet Emissions	38
8. Comparisons with Other Associated Auroral Phenomena	46
8.1. Luminosities	46
8.2. Riometer, geomagnetic activity and optical emissions	47
8.3. Auroral X-rays in balloon altitudes	52
9. Discussions and Conclusions	55
Acknowledgments	57
References	58
