

CONTENTS

Abstract	1
General Introduction	2
PART 1. GEOMAGNETIC EFFECTS OF COSMIC RAY INTENSITY	
1.1. Introduction	6
1.2. Reduction of data	8
1.3. Trajectory calculations of the threshold rigidities	9
1.4. Latitude variation of the cosmic ray intensity	13
1.5. Cosmic ray equator.....	21
1.6. Cosmic ray latitude knee around Cape Town anomaly	23
1.7. Spatial distribution of the vertical threshold rigidities.....	25
1.8. Concluding remarks.....	33
PART 2. SOLAR MODULATION OF COSMIC RAY LATITUDE VARIATION	
2.1. Introduction	35
2.2. Cosmic ray equator.....	37
2.3. Cosmic ray latitude knee	38
2.4. Response functions for the sea-level nucleonic component.....	39
2.5. Comparison of the response function with neutron monitor data obtained from fixed stations.....	44
2.6. Comparison of the response function with PARKER's solar wind model	47
2.7. Application of the threshold rigidities and the response functions to other observation results	49
2.8. Concluding remarks.....	53
General Concluding Remarks.....	55
