Papers presented to the 25th Symposium on Antarctic Meteorites held at the National Institute of Polar Research, Tokyo June 21 – 23, 2000

1. Diósy T., Roskó F., Hegyi S., Keresztesi M., Kovács B., Gránicz K., Drommer B., Tóth Sz., Cech V., Béres Cs.Z., Gimesi L, Herbert J., Imrek Gy., Lengyel P., Fabriczy A. and Bérczi Sz.
   New instrument assemblages for planetary geology on the Hunveyor -1 & -2: Experimental university landers in Hungary: Of the Eötvös (Budapest) and Janus Pannonius (Pécs) Universities
2. Don Gy. and Detre Cs.H.
   Magnetic spherules from the Devonian-Carboniferous boundary (Montagne Noire, France) – A preliminary report
3. Ebihara M. and Sugiura N.
   Chemical behavior of phosphorus in primitive ordinary chondrites
4. Folco L. and Mellini M.
   1990-2000: Ten years of Antarctic meteorite search by the Italian PNRA
5. Fukuoka T., Tazawa Y., Nogami K., Saito Y., Noguchi T. and Yada T.
   Instrumental neutron activation analysis of individual Antarctic micrometeorites collected by the 39th Japan Antarctic Research Expedition
6. Goswami J.N.
   Formation and early evolution of the solar system: Meteoritic constraints
7. Hiroi T., Zolensky M.E. and Lipschutz M.E.
   Possible meteorite analogs for asteroid 1989ML – Target of MUSES-C asteroid sample return mission –
8. Hirota Y., Nakamura N., Onoue H., Misawa K., Yamashita K. and Wang D.
   An anomalous REE component in the Kobe meteorite
9. Hiyagon H.
   An ion microprobe study of oxygen isotopes in some inclusions in Kainsaz and Y-81020 CO3 chondrites
10. Hiyagon H., Mizutani S., Noguchi T., Nakamura T. and Yada T.
    A preliminary study of oxygen isotopes in Antarctic micrometeorites using an ion microprobe
11. Ikeda Y. and Prinz M.
    Phyllosilicate-bearing dark clasts in the polymict ureilites
12. Imai H. and Yurimoto H.
    Distribution of oxygen isotopes in an amoeboid olivine aggregate from the Allende meteorite
13. Itoh S., Kojima H. and Yurimoto H.
    Oxygen isotopic compositions of spinel, olivine and pyroxene grains in Y-691 EH3 chondrite
14. Jagoutz E. and Dreibus G.
    Isotope systematics of SNC meteorites
15. Kimura M., Hiyagon H., Palme H., Spettel B., Wolf D., Clayton R.N., Mayeda T.K., Sato T. and Kojima H.
    Anomalous H-chondrites, Y-792947, Y-793408 and Y-82038, with high abundance of refractory inclusions and very low metamorphic grade
16. Kimura M., Suzuki A., Kondo T., Ohtani E. and El Goresy A.
    The first discovery of high–pressure polymorphs, jadeite, hollandite, wadsleyite and majorite, from an H-chondrite, Y-75100
17. Kiriyama K., Tomeoka K. and Sekine T.
    Shock metamorphic effects of the Allende CV chondrite at 20-50 GPa: An experimental study

18. Kitajima F., Nakamura T., Takaoka N. and Murae T.
Thermal metamorphism of CM chondrites from the viewpoint of graphitization of chondritic carbonaceous macromolecular matter
19. Kiyota K., Sugiura N. and Zashu S.
Nitrogen and rare gases in CO chondrites
20. Kobatake H., Tsukamoto K., Yurimoto H., Kaito C. and Yokoyama E.
Direct observation of evaporation and condensation from silicate melts
21. Kobayashi Y. and Oba T.
The mineral assemblage of symplectites in lunar meteorite Asuka-881757
22. Kojima H.
Some unique achondrites in the Yamato 98 meteorites
23. Komatsu M., Krot A.N., Ulyanov A.A., Keil K. and Miyamoto M.
Mineralogy and petrography of amoeboid olivine aggregates from the reduced CV chondrites Efremovka, Leoville and Vigarano
24. Komura K., Inoue M. and Nakamura N.
Cosmogenic nuclides in Kobe meteorite fell on Sep. 26th, 1999
25. Krot A.N., Hiyagon H., Petaev M.I., Meibom A. and Keil K.
Two stages of asteroidal alteration recorded in rimmed Allende dark inclusions: Evidence from mineralogy and oxygen isotope compositions
26. Kuroda D. and Hashimoto A.
The reaction of forsterite with hydrogen – its apparent and real temperature dependences
27. Lin Y., Wang D., Liu J., Kimura M. and Wang Z.
Two meteorite falls in Zhuanghe city, Liaoning province, China
28. Matsumoto Y., Matsumoto T., Matsuda J. and Nakamura N.
Noble gases in the Kobe meteorite
29. McKay G., Bogard D. and Agee C.
Conceptual design for a receiving and quarantine facility for returned Mars samples
30. Mikouchi T., McKay G. and Le L.
A new angrite Sahara 99555: Mineralogical comparison with Angra dos Reis, Lewis Cliff 86010, Lewis Cliff 87051, and Asuka 881371 angrites
31. Minami M., Takaoka N. and Nakamura T.
An attempt to measure carbon-14 terrestrial ages of Antarctic meteorites with a Tandetron AMS at Nagoya University
32. Misawa K., Yamazaki F., Sawada S., Sekine T. and Nakamura N.
Incorporation of radiogenic lead components into plagioclase during shock metamorphism: A possible redistribution mechanism of volatile lead
33. Mittlefehldt D.W. and Lindstrom M.M.
Hafnium and Tantalum as petrogenetic indicators for weathered Antarctic eucrites
34. Miura Y.N. and Nagao K.
Noble gases in Y-791192, Y-75032-type diogenites, and A-881838
35. Mostefaoui S., Kita N.T., Tachibana S., Nagahara H., Togashi S. and Morishita Y.
The ^{26}Al chronology of chondrules from the least equilibrated chondrites
36. Murae T. and Nakamuta Y.
Investigation of distribution pattern of carbonaceous matter in Kenna meteorite using laser Raman microscope
37. Nagahara H. and Ozawa K.
Chemical fractionation during evaporation in the presence of ambient gas

38. Nakamura K., Klöck W., Romstedt J., Grund T., Greshake A., Erfurth W., Wiegand M., Stenzel H., Basnar B., Friedbacher G., Syrowatka F. and Tomeoka K.
Experimental study on interplanetary dust particles for the Rosetta Mission
39. Nakamura N., Kojima H., Haramura H., Tomeoka K., Clayton R.N. and Mayeda T.K.
The Kobe meteorite; Classification and consortium studies
40. Nakamura T., Kitajima F. and Takaoka N.
Thermal metamorphism of CM carbonaceous chondrites deduced from phyllosilicate decomposition and trapped noble gas abundance
41. Nakamura T., Nozaki W., Noguchi T., Nakamuta Y., Tanaka M. and Takaoka N.
X-ray diffraction analysis of micrometeorites using synchrotron radiation
42. Nakamuta Y. and Aoki Y.
Formation mechanism of diamond in ureilites
43. Newton J. and Sugiura N.
Carbon in iron meteorites
44. Ninagawa K., Endo M., Hatakeyama E., Namba A., Yamazaki M. and Nishido H.
Cathodoluminescence of forsterite and enstatite
45. Noguchi T. and Nakamura T.
TEM study of Antarctic micrometeorites collected at the Yamato Mountains by 39th JARE team
46. Ohta M., Ninagawa K. Toyoda S., Imae N. and Kojima H.
Thermoluminescence study of Japanese Antarctic Meteorites IV
47. Okazaki R., Takaoka N., Nakamura T. and Nagao K.
Subsolar noble gas in chondrules of the enstatite chondrite Y-791790
48. Osawa T., Kagi H. and Nagao K.
Infrared microspectroscopic analyses for meteorites and Antarctic micrometeorites
49. Oura Y., Ebihara M., Yoneda S. and Nakamura N.
Chemical characteristics of Kobe and some other CK chondrites
50. Patzer A. and Schultz L.
The noble gas record of enstatite chondrites
51. Sasaki S., Hamabe Y., Kurahashi E., Kogure T. and Hiroi T.
Simulation of space weathering in the laboratory: New results of olivine, pyroxene, and anorthite samples
52. Sato A., Ninagawa K. and Hyodo H.
Cathodoluminescence and $^{40}Ar/^{39}Ar$ dating of maskelynite in Etter
53. Setoguchi M., Ebihara M., Nagai H. and Honda M.
Measurement for cosmogenic Mn-53 in meteoritic irons
54. Sugiura N., Shuzou Y. and Ulyanov A.A.
Boron isotopic composition of the CAI (E-38) in Efremovka
55. Tachibana S., Tsuchiyama A. and Nagahara H.
Temperature dependence of evaporation of enstatite and its application to the evaporation behavior of enstatite in the primitive solar nebula
56. Takaoka N., Okazaki R., Nakamura T. and Nagao K.
Noble gases released by mechanical crushing of enstatite chondrites and ureilites
57. Takeda H., Yamaguchi A. and Ishii T.
Mineralogy of a new recrystallized monomict eucrite, Dar al Gani 647, and the thermal metamorphism of a Vesta-like asteroid

58. Terada K., Kojima H., Noguchi T., Nakamura T., Yano H., Yada T., Nozaki W., Mori T., Nakai I., Sasaki M., Itabashi M., Nagao K., Osawa T., Hiyagon H., Mizutani S., Murakami T., Fukuoka T., Nogami K., Ohmori R. and Ohashi H.
A consortium study on Antarctic micrometeorites collected by the 39th Japan Antarctic Research Expedition
59. Terada K., Mori T., Sano Y., Noguchi T., Nakamura T. and Yada T.
Ion-microprobe analysis of trace elements in Antarctic micrometeorites using SHRIMP
60. Tomeoka K., Kojima T., Kojima H. and Nakamura N.
The Kobe meteorite: Petrography and mineralogy
61. Tomiyama T., Yamaguchi A. and Misawa K.
Petrology of ALH-77252: An L3-6 polymict chondritic breccia
62. Tsuchiyama A., Kawabata T., Uesugi K., Nakano T., Suzuki Y., Yagi N., Umetani K. and Shirono S.
Three-dimensional structures of chondrules observed by an XTM (X-ray tomographic microscope) at SPring-8: high speed spinning chondrules
63. Tsuchiyama A., Nakamura T. and Nakamura N.
Possibility of three-dimensional description for meteorites by X-ray CT method: Kobe meteorite as an example
64. Tsukamoto K., Kobatake H., Nagashima K., Satoh H. and Yurimoto H .
Crystallization of cosmic materials in microgravity
65. Török K., Bérczi Sz. and Lukács B.
Comparison of Japanese Antarctic and Carpathian Basin Hungarian snouted spherules
66. Xie X., Chen M. and Wang D.
Natural $NaAlSi_3O_8$-Hollandite in the shock melt veins of Suizhou L6 chondrite
67. Xie X., Chen M., El Goresy A. and Gillet P.
Two high-pressure mineral assemblages in shock melt veins of Suizhou L6 chondrite
68. Yada T., Nakamura T., Noguchi T., Yano H., Terada K., Kojima H., Ohmori R., Osawa T., Mizutani S., Mori T., Matsumoto N., Kamata J., Itabashi M. and Setoyanagi T.
Evaluation of the accretion rate of cosmic dust on the earth in the last glacial period based on the concentration of micrometeorites in bare ice around Yamato Mts.
69. Yamada S., Nakamuta Y. and Aoki Y.
Quantitative estimation of shock pressure experienced by ordinary chondrites with an X-ray powder diffraction method
70. Yamaguchi A., Sekine T. and Mori H.
Hot shock experiments of a basaltic eucrite: Implication for impact processes on early hot crust
71. Zolensky M.E., Bodnar R.J., Bell M.S., Saylor J. and Takeda H.
Aqueous fluid-inclusions in chondrites
