写真 16 サストルギの発達を示す写真

Photo. 16 Photographs Showing Stages of Development of Sastrugi.

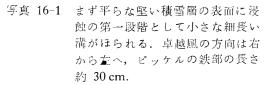

Photo. 16-1 At first small grooves elongated parallel to direction of prevailing wind (right to left) are marked on surface of hard snow layer.

Length of steal part of ice-axe is about 30 cm.

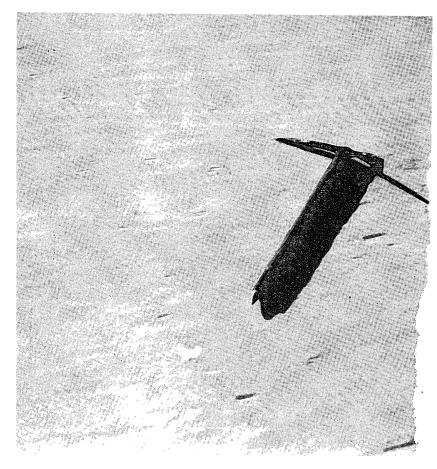

写真 16-2 各溝が成長すると,まず 主に縦方向に互いに連な り合い,ついで横方向に もそれが行なわれる.

Photo. 16-2 The grooves lengthen and link up with each other along the direction of prevailing wind, and then the linkage take place towards direction perpendicular to the former.
