

ANTARCTIC RECORD No. 11

Special Publication of the Antarctic Symposium in Tokyo, 1960

CONTENTS

INTRODUCTION

EARTH SCIENCE

- Geodetic survey in Antarctica by the fourth Japanese Antarctic Research Expedition, 1959-60. . . . *Shinichi Ohashi, Eiichi Inbe and Seiichi Kakinuma* 3
- The first stage in the change of snow into glacier ice. *Zyungo Yosida* 12
- Some geomorphic studies of East Ongul Island; landform classification and morphometry. *Seiichi Hatano* 17
- A mineralogical note on the euxenite-polycrase series mineral from Syowa Base, Antarctica. *Shôichiro Hayashi and Kôzô Nagashima* 27
- Garnet from East Ongul Island in the Antarctic region.
. *Eiichi Minami, Jôyo Oosaka and Tadaharu Nakamura* 31
- *Aerophotogrammetry and mapping in the vicinity of the Ongul Islands.
. *Teruzo Kaji and Arao Yoshida* 36
- *Gravity measurements by the Japanese Antarctic Research Expedition.
. *Hiromichi Suzuki and Shinichi Ohashi* 37
- *On the formation of the puddles of Lützow-Holm Bay. . . *Yoshihiko Takahashi* 38
- *Geomorphic features of the east coast of Lützow-Holm Bay, East Antarctica.
. *Torao Yoshikawa and Hiroshi Toya* 40
- *Movements of calved icebergs along Prince Olav Coast.
. *Yukio Kitani and Arao Yoshida* 41
- *Geology of the region around Syowa Station, Ongul Island, Lützow-Holm Bay, Antarctica. *Tatsuo Tatsumi and Toru Kikuchi* 42
- *Echo sounding and bathymetric chart in the Antarctic Ocean.
. *Takeharu Kumagori, Hiroshi Suzuki and Saburo Yanagawa* 43
- *On the soundings from the sea bottom at the offing of Cape Cook, Prince Harald Coast, Antarctic continent. *Hiroshi Niino* 45
- *On the bottom sediment dredged by the second Japanese Antarctic exploration; especially on the grain size analysis. . . *Daitaro Shoji and Takahiro Sato* 47
- *Foraminifera assemblages of the Antarctic Ocean. *Takayasu Uchio* 48

METEOROLOGY

- Statistics of some weather elements in the vicinity of Lützow-Holm Bay.
 *Narimasa Tajima*..... 51
- Statistical investigation of meteorological data at Syowa Base.
 *Hiroshi Nakashima*..... 68
- Weather and weather forecasting in Lützow-Holm Bay and at Syowa Base.
 *Yushiro Kuga*..... 75
- Upper air observation at Syowa Base (I). *Zenbei Seino*..... 81
- Preliminary report on the westerly waves in the southern ocean.
 *Narimasa Tajima*..... 89
- Weather conditions in the southern hemisphere with special reference to Syowa
 Base from January to the beginning of February, 1959..... *Saburo Tanabe*..... 92
- The effect of sea ice upon the climate of Syowa Base. *Yasutaro Morita*..... 98
- An experimental observation of the evaporation from snow surface.
 *Yasutaro Morita, Nozomi Murakoshi and Eizaburo Nishibori*.....103

OCEANOGRAPHY

- Deep circulation in the Antarctic Ocean. *Michitaka Uda*.....111
- Chemistry of ice, snow and other water substances in Antarctica.
 *Ken Sugawara*.....116
- On the puddle waters in the vicinity of the Ongul Island, Antarctica.
 *Eiichi Minami, Tosimatu Matumoto and Jôyo Ossaka*.....121
- *On the oceanographical surveys in the southern ocean. *Makoto Ishino*.....128
- *Recurvature current in the southern ocean current.
 *Takeharu Kumagori, Keijiro Ozawa and Saburo Yanagawa*.....131
- *The effect of the wind on very close pack ice. *Nobuo Ono*.....133
- *Pack ice in the Lützow-Holm Bukta of the Antarctic.
 *Takeharu Kumagori, Hideo Hôtani and Saburo Yanagawa*.....134
- *Deuterium abundance of natural waters in the Antarctic.
 *Tosizo Titani, Yasuo Horibe and Mituko Kobayakawa*.....138

BIOLOGY

- The pelagic ciliata from Antarctic waters. *Yoshine Hada*.....141
- Birds and seals around Japanese Syowa Base on Prince Harald Coast, Antarctica
 (Preliminary). *Ryoichi Haga*.....146
- Algal vegetation in the Ongul Islands, Antarctica..... *Hiroshi Fukushima*.....149
- Diatoms from some inlandwaters of Antarctica (Preliminary report).
 *Kenichiro Negoro*.....152
- Some remarks on the cultivation of microalgae collected in the Ongul Islands
 and adjacent areas. *Atsushi Watanabe, Hiroshi
 Fukushima, Yoshihiko Fujita, Tisato Kiyohara and Masako Ishikawa*.....154

Mosses from the Ongul Islands and its neighbouring areas (Preliminary report).	<i>Yoshio Horikawa</i>156
*Biological investigation during Antarctic expedition voyage and at East and West Ongul Islands in Antarctica.	<i>Tatsuro Matsuda</i>159
*The life of the Antarctic ocean; the plankton at the offing of Syowa Base in the Antarctic Ocean.....	<i>Jiro Senō</i>159
*On the microflora of the Antarctic zone.	<i>Hiroshi Iizuka</i>161
*Notes on some fungi and yeasts from Antarctica.	<i>Keisuke Tubaki</i>161
*The algae of Syowa Base and Langhovde area.	<i>Minoru Hirano</i>162
*Preliminary reports of the biological studies on coloured ocean ice.	<i>Hiroshi Fukushima</i>164
UPPER ATMOSPHERE PHYSICS	
Report on results of cosmic-ray observations on m/s Soya during the period from November, 1959 to April, 1960.	<i>Shin Fukushima and Tsuyoshi Nakamura</i>165
Cosmic-ray neutron monitor at Syowa Base, Antarctica.	<i>Shin Fukushima, Masahiro Kodama and Yukio Miyazaki</i>174
Observation of aurora noise at Syowa Base.	<i>Takeo Yoshino</i>179
Short range echoes of HF waves observed on the Antarctic Research Expedition ship.	<i>Kunio Hirao</i>184
Longitudinal and latitudinal effect estimated by observations on board the Soya.	<i>Hisashi Shibata</i>191
Seasonal variation of f_0F_2 and abnormal ionization in F region at Syowa Base in Antarctica.....	<i>Noboru Wakai</i>195
Report on geomagnetic total force observation in the Fourth Japanese Antarctic Research Expedition.	<i>Seichi Kakinuma and Yukihiko Muraishi</i>200
Relation between geomagnetic disturbances in the northern and southern polar regions.....	<i>Takesi Nagata and Susumu Kokubun</i>204
Geomagnetic secular variation over and near the Antarctic continent.	<i>Takesi Nagata</i>217
Palaeomagnetic studies on rocks on the coast of Lützow-Holm Bay.	<i>Takesi Nagata and Mitsuko Yama-ai</i>225
Radio wave propagation on the ice cap.	<i>Takeo Yoshino</i>228
*The time variation of cosmic-ray at high latitude (Part 1).	<i>Taiichi Kitamura and Masahiro Kodama</i>234
*Latitude dependency of airglow emissions.	<i>Tsuyoshi Nakamura</i>237
*Statistical study of polar blackout.	<i>Isao Kasuya</i>239
*Distribution of underground electrical resistivity around Syowa Base.	<i>Takashi Oguti</i>245

*Inter-relations among the upper atmosphere disturbance phenomena over the polar region.	<i>Takashi Oguti</i>	247
*Magnetic variation on the Antarctic Ocean near Syowa Base.	<i>Takeharu Kumagori, Hiroshi Suzuki and Saburo Yanagawa</i>	248
LOGISTIC SCIENCE		
Report of telecommunication for the Japanese Antarctic Research Expedition Wintering Team, 1959.....	<i>Takashi Takamuro</i>	253
The present condition of the building at Syowa Station..	<i>Zenkichi Hirayama</i>	260
On the snow-cars used by the Japanese Antarctic Research Expedition.	<i>Takasuke Tsutsui</i>	271
On the generators used at the Japanese Antarctic Station....	<i>Masao Machida</i>	278
Reports on the conditions of mechanical equipments installed at Syowa Station during the third wintering period, 1959-60.	<i>Kanezo Aragane</i>	282
Fuel spending.	<i>Takeo Yoshino</i>	286
Electric machine operation at Syowa Base.	<i>Takeo Yoshino</i>	289
*On the heating system of the observation huts.	<i>Uichi Inoue</i>	295
*Some notes about the dog-sledging equipment used during the first Wintering (Feb. 1957 - Feb. 58), J.A.R.E.	<i>Toru Kikuchi</i>	297
*A hypothetical formula, assumed "Law of Loading", for driving dog-team.	<i>Toru Kikuchi</i>	297
*Report on food supplies during the 3rd wintering period, 1959-60.	<i>Naganori Yoshida</i>	298
*On the aircrafts used by the Japanese Antarctic Research Expedition.	<i>Tsuneo Fujii</i>	304

* Abstract only.
